# I. Scope

## Introduction

This document is published to provide information about Paris Orléans SCA's ("PO") compliance with the public disclosure rules set out in the Regulation No 575/2013 of the European Parliament and of the Council of 26 June 2013 relating to minimum capital requirements (known as "Pillar 3" requirements in the Basel 3 Accord and its European transposition by the Capital Requirement Regulation ("CRR")). PO is registered within the list of Financial Companies supervised by the Autorité de Contrôle Prudentiel et de Résolution ("ACPR").

The Pillar 3 disclosure requirements complement the minimum capital requirements ("Pillar 1") and the supervisory review process ("Pillar 2") and aim to encourage market discipline by allowing market participants to assess key pieces of information on the risk exposures and the risk assessment processes of PO.

This document is available on PO's corporate website ([www.paris-orleans.com](http://www.paris-orleans.com)) along with the PO 2015 Annual Report.

## Basis of disclosure

These risk disclosures are made in respect of PO and its subsidiary undertakings (together "the Group" or "the PO Group").

The following regulated banking entities are fully consolidated in PO's accounts:

- NM Rothschild & Sons Limited ("NMR"), incorporated in the United Kingdom and supervised by the Prudential Regulatory Authority ("PRA") and the Financial Conduct Authority ("FCA").
- Rothschild Bank AG ("RBZ"), incorporated in Switzerland and supervised by the Swiss Financial Market Supervisory Authority ("FINMA");
- Rothschild & Cie Banque SCS ("RCB"), incorporated in France and supervised by the ACPR; and

- Rothschild Bank International Limited ("RBI") and Rothschild Bank C.I. Limited ("RBCI"), incorporated in Guernsey and supervised by the Guernsey Financial Services Commission ("GFSC").

As at 31 March 2015, the regulatory consolidation scope is identical to the statutory consolidation scope.

Unless otherwise indicated, financial information presented in this document is as at 31 March 2015 (PO's financial year-end). As there is a significant overlap between the information disclosure requirements for Pillar 3 and information already disclosed in the PO 2015 Annual Report, this document should be read in conjunction with that report. The PO Group organisation presented in this document is consistent with the governance arrangements described within the PO 2015 Annual Report.

## Verification

These disclosures have been circulated and presented by PO Gestion SAS, Managing Partner of PO, to the PO Audit Committee and the PO Supervisory Board in June 2015. Unless otherwise indicated, information contained within this document has not been subject to external audit. The Pillar 3 disclosures have been prepared purely for the purpose of explaining the basis on

which the PO Group has prepared and disclosed certain capital requirements and information about the management of certain risks, and for no other purpose. They do not constitute any form of financial statement and must not be relied upon in making any judgement on the PO Group.

## 2. Risk Management

### Overview

The guiding philosophy of risk management in the Group is for the management to adopt a prudent and conservative approach to the taking and management of risk. The maintenance of reputation is a fundamental driver of risk appetite and of risk management. The protection of reputation guides the type of clients and businesses with which the Group will involve itself.

The nature and method of monitoring and reporting varies according to the risk type. Most risks are monitored daily with management information being provided to relevant committees

on a weekly, monthly or quarterly basis. Where appropriate to the risk type, the level of risk faced by the Group is also managed through a series of sensitivity and stress tests.

The identification, measurement and control of risk are integral to the management of PO's businesses. Risk policies and procedures are regularly updated to meet changing business requirements and to comply with best practice.

### Structure and Risk Governance

PO Gestion SAS is the executive body of PO responsible for setting and reviewing PO's governance arrangements and for establishing adequate, sound and appropriate risk management processes in line with all legal and regulatory requirements.

Internal control governance within the Group is effected through PO and onwards to the senior executive management committees for each of the Group's businesses and the boards of the principal operating entities. The Group internal control systems is supervised by the PO Supervisory Board, assisted by its specialised committees. PO, represented by its Managing Partner, PO Gestion SAS, has direct oversight of all Group entities in respect of internal control matters and considers all major strategic and other risk matters affecting all parts of the Group. PO Gestion SAS is assisted by the Group Management Committee ("GMC").

The main roles of the committees with responsibility for key risk management areas are as follows:

The **GMC** assists the Managing Partner of PO to formulate strategy for the Group's businesses, to assess the delivery of that strategy, to ensure the proper and effective functioning of Group governance structures, operating policies and procedures, to define the Group's risk appetite and to be responsible for the management of risk.

The **PO Audit Committee**, is a specialised committee of the PO Supervisory Board responsible in particular for supervising and reviewing the Group's internal audit arrangements, review the

independence of PO's statutory auditors and the effectiveness of the Group's internal control systems.

The **PO Risk Committee** is a specialised committee of the PO Supervisory Board responsible for reviewing the Group's broad policy guidelines relating to risk management, particularly the limits which reflect the risk appetite presented to the PO Supervisory Board, and examining the effectiveness of the risk management policies put in place. These policies comprise the structure underpinning the group's approach to managing specific categories of risk as articulated in the Group Risk Framework.

The **Group Assets and Liabilities Committee** ("Group ALCO") is responsible for ensuring that the Group has prudent funding and liquidity strategies for the efficient management and deployment of capital resources, within regulatory constraints, and for the oversight of the management of the Group's other financial strategies and policies, including some credit decisions.

The **PO Remuneration and Nomination Committee** is a specialised committee of the PO Supervisory Board responsible in particular for setting the principles and parameters of the remuneration policies for the Group and determining the nature and scale of short and long term incentive performance arrangements that encourage enhanced performance and reward individuals in a "risk based" manner for their contribution to the success of the Group in light of an assessment of the Group's financial situation and future prospects.

### Risk management framework

The Group has adopted a risk governance model that is applied across the Group and requires that all of the Group's businesses and functions establish processes for identifying, evaluating and managing the key risks faced by the Group. It is based on the concept of 'three lines of defence'.

This model distinguishes between functions owning and managing risks, functions overseeing risks and functions providing independent assurance.

## Group Risk Framework

The Three Lines of Defence for identifying, evaluating and managing risks

First Line of Defence	Second Line of Defence	Third Line of Defence
<p>PO Gestion SAS and the GMC:</p> <ul style="list-style-type: none"><li>■ set the Group's risk appetite;</li><li>■ approve the strategy for managing risk; and</li><li>■ are responsible for the Group's system of internal control.</li></ul> <p>It is the responsibility of senior management to support risk management best practice and to oversee the establishment and implementation of effective risk management systems.</p>	<p>Comprises specialist Group support functions including: Risk, Compliance, Legal, Finance and Human Resources.</p> <p>These functions provide:</p> <ul style="list-style-type: none"><li>■ operational and technical guidance;</li><li>■ advice to management at Group level and operating entity level; and</li><li>■ assistance in the identification, assessment, management, measurement, monitoring and reporting of financial and non-financial risks.</li></ul>	<p>Provides independent objective assurance on the effectiveness of the management of risks across the entire Group.</p> <p>This is provided by the PO Audit Committee and the Group's Internal Audit function.</p>

## Risk types

### Credit and counterparty risk

Credit risk is the risk of loss resulting from exposure to customer or counterparty default.

PO has adopted the Standardised Approach for calculating Pillar 1 capital requirements for credit risk.

### Operational risk

Operational risk, which is inherent in all business activities, is the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events.

PO currently adopts the Basic Indicator Approach for calculating Pillar 1 capital requirements for operational risk (except for RCB which uses the Advanced Measurement Approach).

### Liquidity risk

Liquidity risk is the risk that the Group does not have sufficient financial resources available to meet its obligations as they fall due, or that the Group is unable to meet regulatory prudential liquidity ratios.

The Group performs liquidity stress testing based on a range of adverse scenarios, and has contingency funding plans which are maintained with the objective of ensuring that the Group has

access to sufficient resources to meet obligations as they fall due if these scenarios occur. Stressed liquidity profiles are reviewed by the Group ALCO.

### Market risk

Market risk positions arise mainly as a result of the PO Group's activities in interest rate (including interest rate risk in the banking book), currency, equity and debt markets and comprise interest rate, foreign exchange, equity and debt position risk. Market risk exposures are presented in the PO 2015 Annual Report (page 146).

### Other material risks

Other risks which are, or may be, material arise in the normal conduct of our business. Such risks, which include concentration risk, securitisation risk, business risk, pension obligation risk, capital planning risk (including the risk of excessive leverage) and reputational risk, are identified and managed as part of the overall risk controls and are taken into account in the Supervisory Board's periodic assessment of capital adequacy.

There is additional information regarding credit risks in the PO 2015 Annual Report (page 142); other information regarding liquidity and funding risks is also included (page 148).

## 3. Regulatory Ratios

### Solvency ratios

During the year ended 31 March 2015, PO and the individual entities within the PO Group complied with all of the externally imposed capital requirements to which they were subject. The following table provides a breakdown of consolidated capital requirements, together with regulatory ratios, at 31 March 2015 compared to the capital requirements at 31 March 2014:

(€m)	31/03/2014 <sup>(1)</sup>	31/03/2015 <sup>(1)</sup>
Tier 1 capital / CET 1	860	1,045
Tier 2 capital	128	139
<b>Total Regulatory Capital</b>	<b>988</b>	<b>1,184</b>
Credit Risk	3,246	3,508
Operational Risk	2,029	2,127
Market Risk and Credit Value Adjustment	120	127
<b>Total Risk Weighted Assets</b>	<b>5,395</b>	<b>5,762</b>
<b>Tier 1 / CET 1 ratio</b>	<b>15.9%</b>	<b>18.1%</b>
<b>Total capital ratio</b>	<b>18.3%</b>	<b>20.5%</b>

(1) Fully loaded based on CRR/CRD4 rules as published on 26 June 2013.

The main reasons for the increase of total capital and CET 1 ratios is due to the inclusion of the result for the year despite the deduction of the proposed dividend. Exchange rate movements due to the strengthening of the CHF/USD/GBP against the Euro have a positive impact on both regulatory capital and Risk Weighted Assets. The total impact of these exchange rate movements is approximately 0.6% on a total capital ratio increase of 2.2%.

Risk Weighted Assets ("RWA") relating to credit risk has increased because of exchange rate movements and new Group commitments

in Private Equity, balanced by reductions in lending. On market risk, RWA includes credit value adjustments. Operational risk RWA increased as revenues strengthened (using a three year rolling average of revenues).

Under European Banking Authority ("EBA") transitional rules for 2015, the Tier 1 ratio with the Capital Conservation Buffer ("CCB") must exceed 5.5% and the Global ratio including CCB must exceed 8%. On a fully loaded Basel 3, the Tier 1 ratio with CCB must exceed 8.5% and the Global ratio including CCB must exceed 10.5%.

### Leverage ratio

The Group determines its leverage according to the leverage ratio benchmark as defined by the Basel Committee in January 2014. These rules were transposed into European regulations on 10 October 2014 by way of amended CRR.

The leverage ratio is in an observation phase in order to set minimum requirements.

At 31 March 2015, sustained by the higher Common Equity Tier 1 capital, and as the Group's activities are not highly leveraged, Paris Orléans's leverage ratio was 11.1%.

Appendix A discloses the main characteristics of the leverage ratio (see page 15).

## 4. Regulatory Capital

The table below reconciles the composition of regulatory capital for the PO Group as at 31 March 2015 to the audited financial statements in accordance with Article 2 in Commission implementing regulation (EU) No 1423/2013.

<b>Shareholders' equity including year-end profit (€m)</b>	<b>1,419</b>
Shareholders' equity-Group share	1,419
<b>Non-controlling interests</b>	<b>-</b>
Non-controlling interests per balance sheet	195
Of which: Result for period - MI share	110
Amount not eligible under CRR	(195)
<b>Deductions</b>	<b>(379)</b>
Goodwill and other intangible assets	(271)
Deferred tax assets on losses carried forward	(18)
Proposed dividend	(43)
Securitisation exposures	(30)
Holdings of financial sector entities	(17)
<b>Regulatory adjustments</b>	<b>5</b>
Cash flow hedge reserves	6
Other regulatory adjustments	(1)
<b>Core Tier 1 capital</b>	<b>1,045</b>
<b>Qualifying Tier 2 instruments issued by subsidiaries</b>	<b>139</b>
Undated subordinated debt per balance sheet	361
Amount not eligible under CRR	(222)
<b>Tier 2 capital</b>	<b>139</b>
<b>Total capital base</b>	<b>1,184</b>

Appendix B discloses the main characteristics of the own funds instruments (see page 17).

Appendix C discloses detailed information of the regulatory capital on a full Basel 3 basis and on a transitional basis (see page 19).

## 5. Risk Weighted Assets and Capital Requirements

The ACPR sets out the minimum capital requirement for French regulated financial institutions under CRR rules. CRR sets out the minimum regulatory capital to meet credit, market and operational risk. At 31 March 2015, the Group total capital requirements by risk type were as follows:

<b>Pillar 1 Requirement (€m)</b>	<b>Risk Weighted Assets</b>	<b>Capital Requirement</b>
Credit Risk	3,508	281
Market Risk and Credit Value Adjustment	127	10
Operational Risk	2,127	170
<b>Total</b>	<b>5,762</b>	<b>461</b>

## 6. Credit risk

### Credit risk exposures

All credit risk capital requirements are calculated using the standardised approach.

The table below presents a summary of the Credit Risk Weighted Assets ("RWA") calculation. The net exposure is the exposure that is subject to a credit risk capital requirement after provisions.

The Exposure At Default ("EAD") is calculated after netting effects,

collateral and credit conversion factors but before applying risk weightings. EAD includes off balance sheet exposures that are subject to a Credit Conversion Factor.

The RWA consists of the EAD multiplied by a weighting factor, which varies depending on the credit quality of the counterparty.

Credit risk exposures as at 31 March 2015 were as follows:

<b>Credit risk exposures (€m)</b>	
Net exposure	9,246
Financial collateral	(1,316)
Credit conversion factor	(57)
<b>Exposure At Default</b>	<b>7,873</b>
<b>Risk Weighted Assets</b>	<b>3,508</b>

### Exposures by asset class

The table below shows the analysis of exposures by asset class before credit risk mitigation with substitution effects. Exposures with Central Banks are zero weighted.

<b>Asset Class (€m)</b>	<b>Exposure at default</b>	<b>Risk weighted assets</b>
High Risk Exposures	711	1,066
Other	681	787
Corporates	612	568
Institutions	1,128	277
Equity	169	247
Exposures in default incl. past due	129	180
Commercial Mortgages	114	112
Residential Mortgages	273	98
Retail	126	83
Securitisations	52	51
Collective Investment Units	32	32
Regional Governments	27	6
Sovereigns	156	1
Central Banks	3,646	-
Multilateral Development Banks	17	-
<b>Total</b>	<b>7,873</b>	<b>3,508</b>

High risk exposures comprise mainly unlisted Equity investment from the Merchant Banking business. The Other assets category comprises mainly 'Non credit obligation assets' such as deferred tax assets not otherwise deducted from capital and tangible assets.

## EAD by geographical location and by industry sector

The Group is mainly exposed to Switzerland, United Kingdom and France with approximately 80% of its exposures to these three countries.

EAD by geographical location are as follows:

Geography (€m)	Switzerland	United Kingdom	France	Other	Total
Central Banks	2,752	879	9	6	3,646
Institutions	177	181	321	449	1,128
High Risk Exposures	12	9	136	554	711
Other	81	436	40	124	681
Corporates	30	360	128	94	612
Residential Mortgages	12	147	-	114	273
Equity	88	2	46	33	169
Sovereigns	5	128	11	12	156
Exposures in default incl. past due	-	77	10	42	129
Retail	10	6	63	47	126
Commercial Mortgages	-	109	-	5	114
Securitisations	-	-	-	52	52
Collective Investment Units	-	8	-	24	32
Regional Governments	-	19	-	8	27
Multilateral Development Banks	-	-	-	17	17
<b>Total</b>	<b>3,167</b>	<b>2,361</b>	<b>764</b>	<b>1,581</b>	<b>7,873</b>

By sectors, more than 60% of the exposures are to the Financial and Governments Sectors (Institutions, Sovereign and Central Banks asset classes). Central Banks exposures come mainly from our regulated entities (Bank of England, Banque de France and Swiss National Bank).

## EAD by maturity

The table below sets out an analysis of credit risk by maturity as at 31 March 2015. Residual maturity of exposures is based on contractual maturity dates and not expected or behaviourally adjusted dates.

Maturity band (€m)	< 1 year	1 - 5 years	> 5 years	Undated	Total
Central Banks	3,646	-	-	-	3,646
Institutions	967	132	28	1	1,128
High Risk Exposures	4	544	-	163	711
Other	243	9	-	429	681
Corporates	304	305	2	1	612
Residential Mortgages	33	222	18	-	273
Equity	-	-	-	169	169
Sovereigns	126	15	-	15	156
Exposures in default incl. past due	63	64	-	2	129
Retail	107	18	1	-	126
Commercial Mortgages	72	42	-	-	114
Securitisations	1	-	51	-	52
Collective Investment Units	-	32	-	-	32
Regional Governments	-	27	-	-	27
Multilateral Development Banks	14	3	-	-	17
<b>Total</b>	<b>5,580</b>	<b>1,413</b>	<b>100</b>	<b>780</b>	<b>7,873</b>

The Group's strategy is to reduce its corporate banking activities and to maintain a highly liquid short term position. This results in more than 70% of the exposures having a maturity below 1 year.

## Value adjustment on impaired assets by asset class

Value adjustments (whether through individual or collective provisions or through equity reserves) shown below relate to impaired assets only.

The net exposure takes into account value adjustments but does not include any mitigation from collateral.

Negative value adjustments and provisions by Asset Class (€m)	Impaired gross exposure	Value Adjustments	Net Exposure
High Risk Exposures	84	52	32
Commercial Mortgages	28	22	6
Securitisations	9	3	6
Past due exposures	180	112	68
Equity	26	23	3
<b>Total</b>	<b>327</b>	<b>212</b>	<b>115</b>

## EAD by credit quality

PO uses external credit assessments provided by Standard & Poor's, Moody's and Fitch for all exposure classes. These are used, where available, to assign exposures a credit quality step and calculate credit risk capital requirements under the standardised

approach. Credit quality steps are provided by the regulator and are used to weight asset classes based on the external rating. The following tables provide, by asset class, an analysis of exposures by credit quality steps as at 31 March 2015:

Credit quality (€m)	Credit quality step 1	Credit quality step 2	Credit quality step 3	Credit quality step 4	Credit quality step 5	Credit quality step 6	Unrated	Total
Central Banks	3,643	3	-	-	-	-	-	3,646
Institutions	693	382	1	-	-	-	52	1,128
High Risk Exposures	-	-	-	-	-	-	711	711
Other	-	-	-	-	-	-	681	681
Corporates	20	17	-	-	-	-	575	612
Residential Mortgages	-	-	-	-	-	-	273	273
Equity	-	-	-	-	-	-	169	169
Sovereigns	153	-	3	-	-	-	-	156
Past due exposures	1	-	-	-	-	-	128	129
Retail	9	7	37	-	-	-	73	126
Commercial Mortgages	-	-	-	-	-	-	114	114
Securitisations	20	15	16	1	-	-	-	52
Collective Investment Units	-	-	-	-	-	-	32	32
Regional Governments	5	3	-	-	-	-	19	27
Multilateral Development Banks	17	-	-	-	-	-	-	17
<b>Total</b>	<b>4,561</b>	<b>427</b>	<b>57</b>	<b>1</b>	<b>-</b>	<b>-</b>	<b>2,827</b>	<b>7,873</b>

Credit quality steps correspond to the following external ratings:

Counterparty quality step	Fitch	Moody's	S&P
1	AAA to AA-	Aaa to Aa3	AAA to AA-
2	A+ to A-	A1 to A3	A+ to A-
3	BBB+ to BBB-	Baa1 to Baa3	BBB+ to BBB-
4	BB+ to BB-	Ba1 to Ba3	BB+ to BB-
5	B+ to B-	B1 to B3	B+ to B-
6	<CCC+	<Caa1	<CCC+

## Counterparty credit risk

Counterparty credit risk ("CCR") is deemed to be the risk that a counterparty to a derivative transaction defaults. The duration of the derivative and the credit quality of the counterparty are both factored into the internal capital and credit limits for counterparty credit exposures.

Given the profile of the Group, this type of risk is not material. The table below details CCR exposures. Derivatives positions are not netted.

Counterparty credit risk on derivatives exposures (€m)	Gross Exposure	Financial Collateral	EAD
Banking book	28	-	28
Trading book	156	50	106
<b>Total</b>	<b>184</b>	<b>50</b>	<b>134</b>

## Credit risk mitigation techniques

The value of financial collateral used as credit risk mitigation is €1,316m as of 31 March 2015. The main types of collateral consist of netting agreements for market related transactions and of financial collateral related to Lombard Lending to private clients. Note that exposures to Private Clients that are above €1m are classified as corporate, as defined by CRR.

Net exposure is calculated after value adjustment due a provision or value changes on Available For Sale ("AFS") securities. Fully adjusted exposure is calculated after collateral mitigation on net exposures. EAD includes off balance sheet exposures based on credit conversion factors provided by French regulations.

Financial collaterals (€m)	Net Exposure	Financial collateral	Fully adjusted exposure	EAD	RWA
High Risk Exposures	711	-	711	711	1,066
Other	688	7	681	681	787
Corporates	1,123	493	630	612	568
Institutions	1,842	703	1,139	1,128	277
Equity	169	-	169	169	247
Exposures in default incl. past due	131	2	129	129	180
Commercial Mortgages	114	-	114	114	112
Residential Mortgages	287	14	273	273	98
Retail	251	97	154	126	83
Securitisations	52	-	52	52	51
Collective Investment Units	32	-	32	32	32
Regional Governments	27	-	27	27	6
Sovereigns	156	-	156	156	1
Central Banks	3,646	-	3,646	3,646	-
Multilateral Development Banks	17	-	17	17	-
<b>Total</b>	<b>9,246</b>	<b>1,316</b>	<b>7,930</b>	<b>7,873</b>	<b>3,508</b>

## Securitisations

The Group's primary securitisation focus is on managing securitisation vehicles on behalf of third party investors. This may involve the transfer of some assets from the Group, but these are immaterial in both the context of Group's and the securitisation vehicles' balance sheets. The Group does not underwrite or provide liquidity support to these vehicles.

The Group may invest in both its managed vehicles and third party securitisations. The table below sets out investments in securitisations by credit quality step as at 31 March 2015:

Securitisation type (€m)	Credit quality Step	Total EAD	RWA	RWA before deduction from regulatory capital
Resecuritisation	1	1	-	6
Resecuritisation	2	10	10	31
Resecuritisation	3	12	26	33
Securitisation	1	19	4	3
Securitisation	2	5	2	3
Securitisation	3	4	5	23
Securitisation	4	1	4	77
<b>Total</b>		<b>52</b>	<b>51</b>	<b>176</b>

## 7. Market risk

Market risk arises mainly from FX risk in the Group's Merchant Banking activities, which do not systematically hedge FX exposures on gains that are not realised. Market risk capital requirements split by risk type were as follows at 31 March 2015:

Market risk (€m)	Risk Weighted Assets	Capital requirement
Fx risk	68	5
Interest Rate risk	1	-
Equity risk	9	1
Commodity Risk	35	3
Credit Value Adjustment	14	1
<b>Total</b>	<b>127</b>	<b>10</b>

All market risk requirements are calculated using the standardised approach.

Interest rate risk from the non-Trading Book is described within the PO 2015 Annual Report (page 148).

## 8. Operational risk

The capital requirement for operational risk is calculated using the Basic Indicator Approach for the PO Group except for RCB where the use of the Advanced Measurement Approach has been authorised by the ACPR.

The Group Operational Risk Policy defines roles, responsibilities and accountabilities across the Group for the identification, measurement, monitoring and reporting of operational risks. Risk maps are developed by each business and support unit.

The nature of PO's businesses means that operational risks are most effectively mitigated through the application of rigorous internal procedures and processes, with a particular emphasis on client take-on, identification of conflicts of interest, project-specific appointment letters, formal approval of new products and quality controls in transaction implementation. This is supported by a programme of training on PO Group's procedures and regulatory and compliance issues. The PO Group manages its operational risks through a variety of techniques, including monitoring of incidents, internal controls, training and various risk mitigation techniques, such as insurance and business continuity planning.

One of the objectives of the Group Operational Risk Policy is to ensure that operational risk is managed and reported consistently across the Group. Senior management of each business and support unit are required to:

- identify the operational risks which are material in their business;
- describe the controls in place to mitigate these risks; and
- assess the potential impact of each risk, and the likelihood of an event occurring (after taking account of mitigants in place).

Senior management in the operating entities are required to identify, escalate and report operational risk incidents and control weaknesses which give rise to or potentially give rise to financial loss or reputation damage.

The ACPR authorised RCB to use the Advanced Measurement Approach in December 2007. The RCB framework is composed of both qualitative and quantitative elements. The qualitative elements follow the requirements for the PO Group as set out in the Group Operational Policy. The quantitative elements comprise an internal model that quantifies material operational risks. The RCB internal model inputs are internal data, external data, scenario analysis and Key Risk Indicators that reflect the business and internal control environment. Internal losses are collected without threshold at RCB. Scenario analyses are defined with business experts for material risks. The RCB model is composed of ten risk classes based on the combination of Basel business lines and Basel risk categories:

- Internal fraud;
- External fraud;
- Employment practices and workplace safety;
- Clients, products, and business practices;
- Damage to physical assets;
- Business disruption and system failures;
- Execution, delivery, and process management.

The RCB insurance programme has been revised during the deployment of the Operational Risk Advanced Measurement Approach framework to allow the recognition of the effect of insurance techniques as a factor reducing capital.

Operational risk (€m)	Risk Weighted Assets	Capital requirement
Basic Indicator Approach	1,752	140
Advanced Measurement Approach	375	30
<b>Total</b>	<b>2,127</b>	<b>170</b>

# Appendix A - Leverage Ratio

Disclosure according to Article 451 in CRR (EU) No 575/2013

## Summary reconciliation of accounting assets and leverage ratio exposures

Template reference		Applicable Amounts (€m)
1	Total consolidated assets as per published financial statements	9,079
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure according to Article 429(11) of Regulation (EU) NO. 575/2013	-
4	Adjustments for derivative financial instruments	110
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	-
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off-balance sheet exposures)	568
7	Other adjustments	(342)
8	Leverage ratio exposure	9,415

## Split-up of on balance sheet exposures excluding derivatives and Securities Financing Transactions (SFTs)

Template reference		CRR leverage ratio exposures (€m)
EU-1	Total on-balance sheet exposures (excluding derivatives and SFTs), of which:	8,323
EU-2	Trading book exposures	26
EU-3	Banking book exposures, of which:	8,297
EU-4	Covered bonds	-
EU-5	Exposures treated as sovereigns	3,819
EU-6	Exposures to regional governments, MDB, international organisations and PSE NOT treated as sovereigns	27
EU-7	Institutions	989
EU-8	Secured by mortgages of immovable properties	383
EU-9	Retail exposures	82
EU-10	Corporate	1,058
EU-11	Exposures in default	131
EU-12	Other exposures (eg equity, securitisations, and other non-credit obligation assets)	1,808

## Leverage ratio common disclosure

Template reference		CRR leverage ratio exposures
<b>On-balance sheet exposures</b>		
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	8,323
2	Asset amounts deducted in determining Tier 1 capital	(342)
3	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)	7,981
<b>Derivative exposures</b>		
4	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	63
5	Add-on amounts for PFE associated with all derivatives transactions	110
EU-5a	Exposure determined under Original Exposure Method	-
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	-
7	Less: Deductions of receivables assets for cash variation margin provided in derivatives transactions (reported as negative amounts)	-
8	Less: Exempted CCP leg of client-cleared trade exposures (reported as negative amounts)	-
9	Adjusted effective notional amount of written credit derivatives	-
10	Less: Adjusted effective notional offsets and add-on deductions for written credit derivatives (reported as negative amounts)	-
11	Total derivative exposures (sum of lines 4 to 5a)	173
<b>Securities financing transaction exposures</b>		
12	Gross SFT assets (with no recognition of netting), after adjusting for sales accounting transactions	-
EU-12a	SFT exposure according to Article 220 of Regulation (EU) NO. 575/2013	693
EU-12b	SFT exposure according to Article 222 of Regulation (EU) NO. 575/2013	-
13	Less: Netted amounts of cash payables and cash receivables of gross SFT assets (reported as negative amounts)	-
14	CCR exposure for SFT assets	-
15	Agent transaction exposures	-
16	Total securities financing transaction exposures (sum of lines 12a and 12b)	693
<b>Other off-balance sheet exposures</b>		
17	Off-balance sheet exposure at gross notional amount	568
18	Less: Adjustments for conversion to credit equivalent amounts (reported as negative amounts)	-
19	Off-balance sheet items (sum of lines 17 and 18)	568
<b>Capital and total exposures</b>		
20	Tier 1 capital	1,045
EU-21a	Exposures of financial sector entities according to Article 429(4) 2 <sup>nd</sup> subparagraph of Regulation (EU) NO. 575/2013	-
21	Total exposures (sum of lines 3, 11, 16, 19 and 21a)	9,415
<b>Leverage ratio</b>		
22	End of quarter leverage ratio	11.1%
EU-22a	Leverage ratio	11.1%
<b>Choice on transitional arrangements and amount of derecognised fiduciary items</b>		
EU-23	Choice on transitional arrangements for the definition of the capital measure	Fully phased-in
EU-24	Amount of derecognised fiduciary items	-
