

Job Specification

Job Title: Investment Manager
Division: Merchant Banking

Rothschild Merchant Banking

A balanced perspective, shaped by the Rothschild family's investing tradition of consistently generating long-term value through an equal emphasis on both risk and return.

Rothschild Merchant Banking is the investment arm of the Rothschild Group with global commitments in excess of €5 billion across Corporate Private Equity, Secondaries, Multi-Managers Mandates and Co-Investments, Direct Lending and Credit Management. Our business is founded on a passion for investing, respect for risk, and culture of partnership – all of which define our perspective as a business.

While other financial institutions talk about working in partnership with clients, we – our firm and our people – invest significant amounts of capital alongside our investors in each of our funds and encourage our managers to invest alongside us in the companies they run. This ensures that our interests are fully aligned with those of our stakeholders.

Our investing ethos is centred on delivering attractive risk-adjusted returns to our investors. We are convinced that this is the only way to consistently create long-term value.

The Rothschild family has an investing history dating back more than 200 years - particularly for backing entrepreneurs who were ahead of their times. We celebrate this legacy and passion for investing. So much so that it is the single most important attribute we seek in our people.

This investment philosophy gives us a balanced and long-term perspective that seeks to protect investors from capital loss – and to deliver long-term value through an equal emphasis on risk and return.

Responsibilities

Rothschild is looking to recruit a credit Investment Manager to join an eighteen-strong team and support the management of the portfolio. The successful candidate will lead new leveraged finance transactions, including oversight of junior analysts, and manage a portfolio of sector based existing credits. The ideal candidate will be an experienced credit Investment Manager, capable of appraising complex credit transactions, ideally with European leveraged finance or private equity experience.
