Monthly factsheet

March 2022

Portfolio manager's commentary

Portfolio concludes the month with outperformance

During the month, the portfolio continued to navigate the fallout of the war in Ukraine whilst tackling the rate hikes of various Central Banks. In contrast to the ECB, which has not raised rates so far and the BoE, which has continuously raised rates since the start of the year, this was the Fed's first rate hike since 2018.

This intensified the headwinds experienced because of the inflation surge and supply chain interruptions. Yet, the portfolio recovered some of its losses in March to outperform its benchmark.

Triggered by the war, commodity prices have risen sharply, and it could well be that margins for industrial companies come under pressure. To mitigate this, we reduced our position in the Industrials ETF.

Further activity came in the form of a switch within our Japanese exposure.
During its holding period, we oversaw good performance from the T.Rowe Price Japan Equity fund. However, lately, our monitoring drew concerns whether the fund can maintain or improve its performance in the nearer term.
Hence, we prefer to exit the vehicle now and monitor from the side-lines by holding the market. Consequently, we switched to the UBS MSCI SRI Japan ETF ('SRI Japan'). This vehicle invests in Japanese large and mid-cap stocks contained in the MSCI Japan SRI Low Carbon Select 5% Issuer Capped Total Return Net Index.

Remarks

- The ESG track record and the MSCI ESG Rating measure how well a company performs on environmental, social and governance issues compared to other companies (peers) in the same industry. The importance of the 3 different factors varies by industry. Companies with a below average ESG track record / MSCI ESG Rating are considered riskier since they are more likely to be impacted by factors such as controversies, new social and environmental regulations, bad reputation, litigation risk, poorly motivated work force and financial mis-management.
- The Carbon Exposure Risk measures the probability and severity that a company is negatively impacted by climate change. Climate change exposure can be physical, for example through extreme heat or flooding, policy related, for example through the introduction of a carbon tax, or technological, for example through competitors developing greener products. The risk is a function of the company's exposure to climate change and of how well the company is managing that exposure.
- The CO2e Sales Intensity measures how much CO2 equivalents are emitted by a company per USD 1 million sales in the most recent reporting year as reported by MSCI ESG Research. The emissions are direct emissions generated by sources owned or controlled by the company and those from the generation of purchased energy.
- The ESG distributions in the charts exclude money market and derivative positions such as foreign currency forwards.

Important information

All performance data refers to share class Acc X.

Source: Rothschild & Co and Bloomberg

Sharpe ratio: Sharpe Ratio is the statistical measure of excess portfolio return over the risk-free rate relative to its standard deviation.

Annualized Volatility: Annualized Volatility is the measure of return dispersion for an asset over twelve month since inception.

Maximum Loss: This is the largest monthly drop in the portfolio's value during a given period. It is expressed as a percentage and reflects the fall in value during the time between the draw down peak (highest value) and the drawdown valley (lowest value).

This document is issued by the Rothschild & Co WM SICAV SIF, a société anonyme incorporated under the laws of Luxembourg, on a strictly confidential basis to a limited number of potential investors, being "wellinformed investors" pursuant to the Luxembourg Law of February 13, 2007 relating to specialized investment funds, as amended (the "SIF Law"), who have indicated their potential interest for the Rothschild & Co WM SICAV SIF. This document does not constitute a personal recommendation or an offer or invitation to buy or sell securities or any other banking or investment product.
