Monthly factsheet

February 2023

Portfolio manager's commentary

Challenging month curbs positive start to the year

Major central banks continue to raise interest rates with further tightening ahead and this resulted in a difficult month for capital markets.

In February, we largely saw a retracement in the portfolio's performance from the fantastic January. This is exhibited in the stock and style selection. In stock picking, Adobe, Alibaba and Alphabet were amongst the largest detractors where they almost totally reversed their January gains. Also, sentiment was effervescent in January. In turn, it pushed our style preference for high quality, growth names, yet this month the market reacted toward value names. We see this as a reaction to sentiment.
Furthermore, the earnings season was mixed and profit margins continue to be troubled by inflation. Whilst these factors caused a slump in performance this month, we remain in positive territory for the year.

In portfolio activity, we took advantage of a strong market run in January to trim some Alphabet and create some "dry powder".

Finally in Fixed Income, we decided to complete the transition from the Muzinich Global Short Duration IG fund (Muzinich GSD) into the R-co Conviction Credit EUR fund (R-co Credit). Yields continued to push up across the interest rate curve in all major currencies. Previously, when yields were low it was advantageous to hold the Muzinich GSD and keep this shorter duration position. Following the strong move up in yields, it has served its purpose in the portfolio. Thus, we decided to invest the capital at higher yields, where we believe we can benefit from slightly lengthening the duration of the portfolio.

Remarks

- The ESG track record and the MSCI ESG Rating measure how well a company performs on environmental, social and governance issues compared to other companies (peers) in the same industry. The importance of the 3 different factors varies by industry. Companies with a below average ESG track record / MSCI ESG Rating are considered riskier since they are more likely to be impacted by factors such as controversies, new social and environmental regulations, bad reputation, litigation risk, poorly motivated work force and financial mis-management.
- The Carbon Exposure Risk measures the probability and severity that a company is negatively impacted by climate change. Climate change exposure can be physical, for example through extreme heat or flooding, policy related, for example through the introduction of a carbon tax, or technological, for example through competitors developing greener products. The risk is a function of the company's exposure to climate change and of how well the company is managing that exposure.
- The CO2e Sales Intensity measures how much CO2 equivalents are emitted by a company per USD 1 million sales in the most recent reporting year as reported by MSCI ESG Research. The emissions are direct emissions generated by sources owned or controlled by the company and those from the generation of purchased energy.
- The ESG distributions in the charts exclude money market and derivative positions such as foreign currency forwards.

Important information

All performance data refers to share class Acc X.

Source: Rothschild & Co and Bloomberg

Sharpe ratio: Sharpe Ratio is the statistical measure of excess portfolio return over the risk-free rate relative to its standard deviation.

Annualized Volatility: Annualized Volatility is the measure of return dispersion for an asset over twelve month since inception.

Maximum Loss: This is the largest monthly drop in the portfolio's value during a given period. It is expressed as a percentage and reflects the fall in value during the time between the draw down peak (highest value) and the drawdown valley (lowest value).

This document is issued by the Rothschild & Co WM SICAV SIF, a société anonyme incorporated under the laws of Luxembourg, on a strictly confidential basis to a limited number of potential investors, being "wellinformed investors" pursuant to the Luxembourg Law of February 13, 2007 relating to specialized investment funds, as amended (the "SIF Law"), who have indicated their potential interest for the Rothschild & Co WM SICAV SIF.
